(See related story, "Bright/74 Study: No New Roads" under Recent News on the homepage.)

(Sept. 14, 5 p.m.) The Open House for the Bright/74 Study being conducted by the Ohio-Kentucky-Indiana Council of Governments is in progress until 7 p.m. at the Performing Arts Center at East Central High School.

Those attending can see proposals for improvements to existing roads, which is the only discussion on the table now as part of the study. A public survey is also in progress online until Oct. 14 at this link: <http://bright74.oki.org/>

About 70 people arrived in the first hour of the Open House, which began at 4 p.m.

Public opposition, as shown in two prior surveys and an online petition organized by Bright resident Brian DeBruler, led to the elimination from consideration of three concepts for connector roads from the Bright area to I-74.

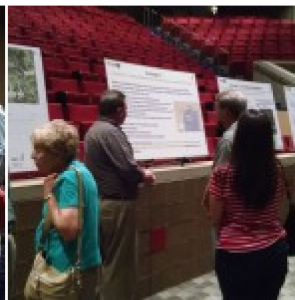

(Check back for updates and see related story under Recent News.)

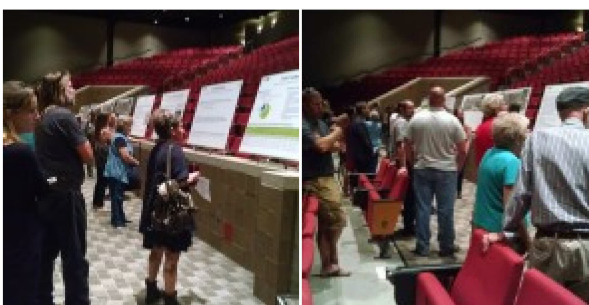

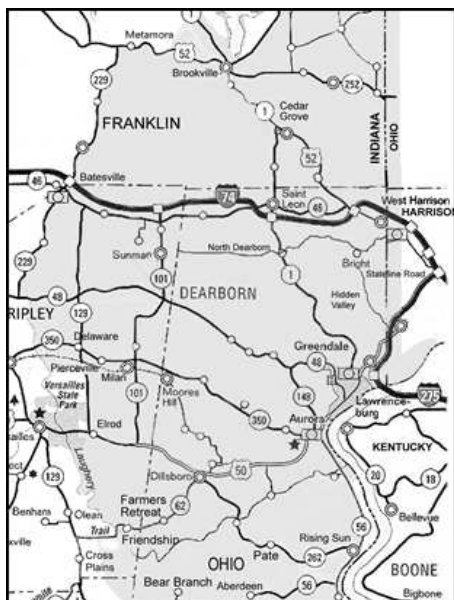

North Dearborn Road resident TJ Jacobs points out areas that could be impacted by proposed road improvements.

NoBright74 petition organizer Brian DeBruler (center) meets with Open House attendees Phil Darling and Les Finn.
